Force 911 Features Bi-Fuel Vehicles at Clean Cities Atlanta Clean Start Propane Workshop

Pendergrass, Georgia, March 16, 2011 – Force 911 participated in the Clean Cities Atlanta Clean Start Propane Workshop on Wednesday, March 9, 2011 at the Manheim Drive Center in Stockbridge, Georgia. The one day event featured several speakers in the propane gas industry as well as a Ride and Drive for participants to test drive propane autogas vehicles.

Force 911 exhibited two bi-fuel propane vehicles, a 2007 Ford Crown Victoria Police Interceptor and a 2010 Chevrolet Silverado 1500. Each vehicle is installed with the PRINS Vapor Sequential Injection (VSI) System which allows the automobiles to operate on propane autogas or traditional gasoline at the push of a button. The PRINS system is available for several makes and models of vehicles.

Force 911 has converted several law enforcement fleets to clean burning propane autogas. Propane autogas costs approximately 30% less than gasoline and produces significantly lower emissions than gasoline or diesel. The higher octane of propane autogas makes it a viable alternative for fleets that require speed and performance. Additional benefits include increased engine life and extended oil change intervals resulting in reduced maintenance costs.

Charles Gregory, Sales/Installation Manager, Force 911, stated "As fleets look for ways to reduce fuel expense due to rising gas prices, bi-fuel vehicles become an attractive alternative because of the flexibility to operate the cars on traditional gasoline or propane autogas. Many fleets work with their local propane provider to install a fueling station at their fleet base. The vehicle conversion process requires approximately 1-2 days per vehicle depending on the make and model, so there is minimal downtime."

Over 14 million vehicles worldwide operate on propane autogas. 90% of propane autogas is produced in the United States, creating less dependence on foreign oil.

About Force 911

Force 911 is a complete source for law enforcement and public service vehicles, providing outfitting for various law enforcement and government agencies. Force 911 offers equipment installation, K9 transport units, propane fuel conversions, department graphics and other services. Force 911's main conversion center is located north of Atlanta in Pendergrass, Georgia, For more information about Force 911, please visit www.force911.com or call 678-919-7911.
